

Felix E. Vaquilar, P.E.

**Chief Engineer,
Fresno Irrigation District**

Felix E. Vaquilar is the Chief Engineer at the Fresno Irrigation District (FID). He is a registered Civil Engineer and holds a B.S. in Civil Engineering from the University of California, Los Angeles.

In his role as Chief Engineer, Felix oversees in-house and consultant-led projects that support the District's facilities and infrastructure. His responsibilities include managing projects from preliminary design through construction close-out and providing technical support for the operation and maintenance of District systems. Felix has supervised the successful construction of groundwater recharge basins, pipeline replacement projects, and canal lining improvements. He has also played an important role in coordinating the California High-Speed Rail Project as it relates to District facilities and operations.

Felix joined the District in 2006 as an Engineer following his experience working on development and transportation infrastructure projects with Greenwood & Associates, RJA & Associates, HNTB Corporation, and Caltrans.

Felix and his family enjoy camping and road trips, and he also enjoys golfing and attending his sons' school and music performances.
